OBJECTIVE

"Seeking a challenging role as a software developer and tester, utilizing my expertise in java Committed to crafting high-quality software solutions by merging development and testing skills, contributing to team success, and embracing continuous learning in a dynamic professional setting."

EDUCATION

BCA [BACHELOR OF COMPUTER APPLICATION**] [AGGREGATE OF 86%]**

• **DECEMBER 2020 – JUNE 2023**

• **SGTBIM&IT**

SKILLS

Programming Languages:
Java & OOPs Concept, C++.

Web Development:
HTML, CSS, WordPress.

Database Management:
SQL

Software Testing:
Manual Testing, Automated Testing, Selenium
Unit testing, **Integration testing**.

Soft Skills:
Communication skills, teamwork, time management, adaptability, and a willingness to learn new technologies.

EXPERIENCE

● **INTERN • LIGHTNING AUTOMATION LTD [TESTER]• JULY 2022 – SEPTEMBER 2022 & MARCH 2023 – JUNE 2023**

During my 6-month internship at the sentro project, I played a pivotal role in the insurance domain by conducting comprehensive testing of both the user interface and the database. I excelled in performing thorough regression testing, which ensured the project's stability and functionality. My responsibilities extended to generating detailed test reports for the client, showcasing my ability to communicate complex technical information effectively. I actively participated in defect identification, logging, and collaborating with developers to ensure their timely resolution. My contributions directly contributed to the project's quality and success.

PROJECTS

ACADEMICS

● **FOOD ORDERING WEBSITE**

I'm in charge of making sure our food website looks great and works well when people use it. I test everything to make sure it's easy to use. I also design how the website looks and make it easy for everyone to order food smoothly.

● **PERSONEL PORTFOLIO WEBSITE**

Crafting a captivating digital space to showcase skills, achievements, and personality through an interactive personal portfolio website, highlighting expertise creatively and effectively.

OTHERS

● **ELECTRICITY BILLING SYSTEM**

In the electricity billing system project, I lead testing and development using Java. My responsibilities include crafting efficient algorithms, ensuring seamless integration of billing modules, and conducting rigorous testing to guarantee optimal functionality and reliability, enhancing user experience in managing electricity consumption and billing statements.
